

LETTER OF RECOMMENDATION

I am writing this reference letter in support of ABC who is applying to the Master in Science program at your esteemed University. I have known ABC in my capacity as his Professor for over three years now during which, I taught him the courses Thermodynamics, Heat & Mass Transfer, Renewable Sources of Energy and Advanced IC Engines in the first, fourth, fifth and sixth semesters respectively. Through my observation, I would like to say that he is attentive and studious and always possesses a positive attitude towards academics.

Throughout his course of study, ABC has shown great interest in practical aided learning techniques. We engaged in several courses and research related discussions in which, he confidently talked about his aspirations towards higher education. For his project, he chose the significantly complex topic of 'Enhancing Efficiency of Screw Press Oil Expeller Roller'. Besides this, he has also gained experience in numerous simple concepts, which are highly valuable for the future generation.

Besides the academic record, ABC's participation in MIRAGE'14, state-level project competition for Mechanical Engineering students held in our college, clearly displays his interest in the manufacturing and creative sector. As a person who is always ready to take up responsibility, he carries out his duties with immense dedication.

I have the deepest personal and professional respect for him, and sincerely believe ABC will bring his unique energy, optimism, passion, and tireless creativity to your class and University as a whole. Thus, he has my highest endorsement for admission into his desired course at your University. If you have any questions about this recommendation, please do not hesitate to contact me for I will gladly try to help.

Sincerely,
